...plastics

Camera/laser adjustment in labeling system

This labeling system uses drylin® SHT and SLW lead screw tables for camera and sensor positioning

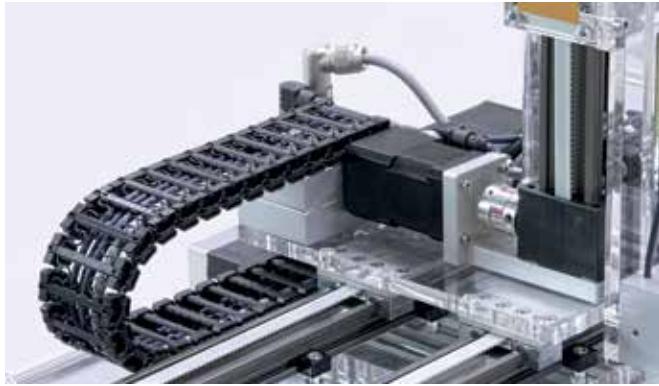

Milling head positioning

drylin® lead screw tables work well in environments with metal shavings due to the lack of wet lubricants.

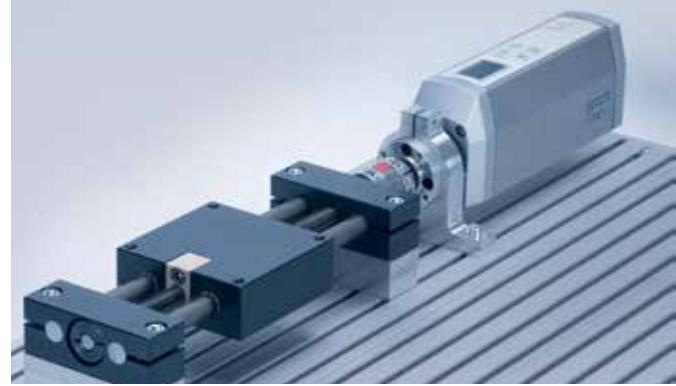

Height adjustment of coding device

The drylin® linear actuators give variable and precise adjustment, free from any maintenance or lubrication. (Filtec Europe GmbH)

Pick and place

Quick and maintenance-free handling with drylin® belt driven actuators in this gantry application

Electric actuator

drylin® linear actuators combined with an electric actuator for use in a variety of format adjustments. (Festo AG & Co. KG)

Adjustment of inspection camera

drylin® ZLW toothed belt axis in an inspection camera adjustment for checking the position of sealing rings. (OLPE Jena GmbH)

Train ticket detection

The drylin® SLW linear actuators with position indicator and hand wheel adjusts the sensors which detect the edges of the train ticket and any print marks.

drylin® drive & actuator technology | linear actuators

The drylin® product portfolio provides self-lubricating linear actuators that are driven either by a lead screws, belts, or rack-and-pinion systems. The systems are available in several materials, are modular, and easy to customize to with many motors and manual accessories. They are made to your stroke and application requirements.

When to use it?

- For format adjustments
- In extreme environments
- When a cost-effective, ready-to-fit solution is required
- When corrosion resistance is required
- When a quiet operation is required

When not to use it?

- When high loads need to travel at highly dynamic forces
- When positioning accuracy <0.1mm is required
- When high running performance is required in continuous operation

Standard

Min. 32°F (0°C)

Max. +140°F (+60°C)

Stainless steel version with iglide® X

Min. 32°F (0°C)

Max. +356°F (180°C)

When to use it?

- Fast positioning of small loads
- Quiet operation
- Slim design
- Underwater use with UW belt
- Cost-effective solution as basic version
- Continuous operation

When not to use it?

- When high loads need to travel at highly dynamic forces
- When positioning accuracy <0.1mm is required

Standard⁹¹⁾

Min. 32°F (0°C)

drylin® drive & actuator technology | Product overview

SHT linear actuators

- Drive: Trapezoidal or high-helix lead screw
- Ball-bearing mounted lead screw drives for higher speeds
- Carriage in either quad block or compact design

► Page 1565

SLW linear actuators

- Based on drylin® W
- Drive: Trapezoidal or high-helix lead screw
- Torsion-resistant double shaft systems

► Page 1581

SAW linear actuators

- Drive: ball bearing supported lead screw
- Rail height optimized for motor connection
- Extremely torsion-resistant

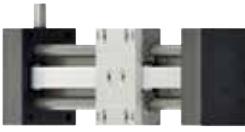

► Page 1599

SLT linear actuators

- Multiple lead screw options
- Adjustable drylin® T miniature carriage
- Lead screw arrangement can be selected either left or right

► Page 1615

ZLW toothed belt axes

- Versions basic, standard and low-cost econ
- For fast positioning
- End supports with ball bearing

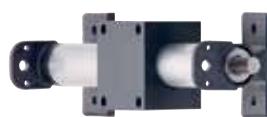

► Page 1623

drylin® automation

- Self-lubricating linear actuator with motor
- Ready to install with motor, cable and initiator
- Drive: Lead screw, toothed belt or rack

► Page 1665

SET easytube linear actuators

- Corrosion-resistant
- Lightweight due to aluminum and plastic
- Simple, smooth design, protected lead screw

► Page 1607

SLN miniature linear actuators

- Based on drylin® N, low installation height
- Basic, adjustable and preload versions

► Page 1619

econ entry-level series

- Lightweight
- Cost-effective
- Corrosion-resistant

► Page 1653

GRW Gear rack drive

- Rack-and-pinion
- Ideal for vertical z-axes

► Page 1644

Accessories for linear actuators

- Position indicator, hand wheels, lead screw clamps, angular drives and more

⁽¹²⁰⁾ When configuring your linear actuator, we ask that you note the igus® specifications for maximum stroke lengths. The performance and load specifications shown above for all drive units are based exclusively on stroke lengths within the recommended values. Exceeding these can result in undesirable effects to the function such as increased wear and noise. Belt or lead screw contact cannot be excluded, and the rated performance and load specifications may not be attainable.

¹²¹⁾ Linear actuator on plain bearings require an aluminum shaft end support when connected to a motor. The technical values in the specifications are maximum values for each criterion, e.g. speed, stroke length etc.; they are not cumulative values. Suitability under consideration of the individual parameters for usage can be checked online at www.igus.com/linearmodule-finder.

¹²¹⁾ Linear actuator on plain bearings require an aluminum shaft end support when connected to a motor. The technical values in the specifications are maximum values for each criterion, e.g. speed, stroke length etc.; they are not cumulative values. Suitability under consideration of the individual parameters for usage can be checked online at www.igus.com/linearmodule-finder.

drylin® drive & actuator technology | Technical options

The following options can be configured online with the SHT configurator:

www.igus.com/drylinHTSconfigurator

Pre-load (PL)

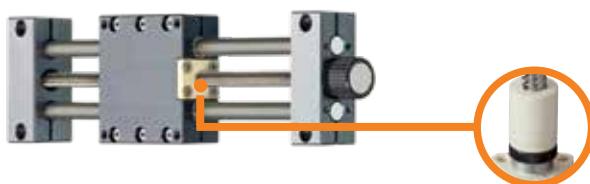

The axial pre-load reduces the backlash of the system. Positioning and repeatability can be optimized. The required drive torque increases only slightly.

For SHT, SLW and SAW linear modules

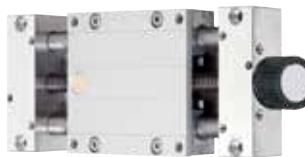

Zero-backlash (ZB)

Self-adjusting zero-backlash lead screw nuts are available for SHT modules in sizes 08 and 12. For movements that require repeatability and which use through high helix thread, the ZB function provides a minimal lifelong backlash.

Linear modules with ball-bearing mounted lead screw

The SHT and SLW linear modules with ball bearing supported lead screws give reduced vibration, and increased dynamic speed capability. These are also suitable for applications with motor drives. Ball bearings are recommended when RPM's exceed 100.

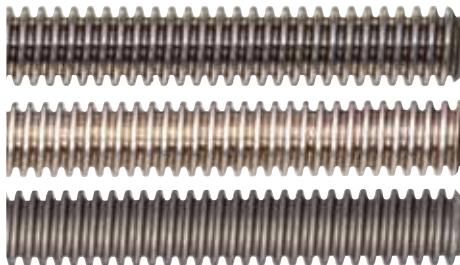

Shaft materials

When using linear modules of the SHT series, you can choose a shaft material from steel, stainless steel, or hard-anodized aluminum (standard).

Lead screw materials

All drylin® linear modules can be delivered with self-locking trapezoidal steel and stainless steel lead screws; upon request, these can also be made from hard-anodized aluminum. The SHT and SLW series can also be configured with stainless steel high helix lead screws. This allows for much higher leads and drive speeds, but without the self-locking feature.

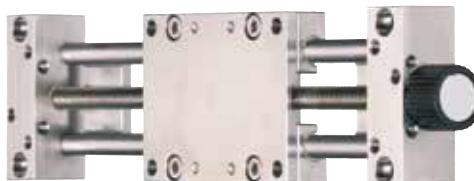

Bearing materials

The bearing surfaces of the drylin® drive units are equipped with lubrication and maintenance-free igus® high performance polymers. Options include materials for high temperature application up to +356°F (+180°C) (iglide® X, SHT-ES series), and also for FDA-compliant environments (iglide® A160).

Complete solutions made of stainless steel

The use of AISI 316Ti and AISI 304 makes of the guides resistant to seawater and chemical contact corrosion. The guide shafts are also made from AISI 316Ti.

drylin® drive & actuator technology | Technical options

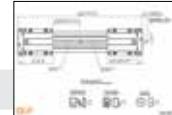

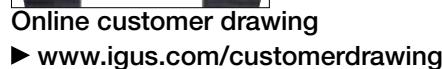

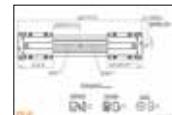

Linear modules with several carriages

All drylin® linear modules can be configured with multiple carriages. The short carriages from the SHTC series are ideally suited for this.

Right/left opposite drive

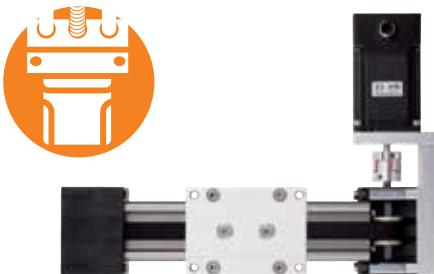

Self-centering left/right screws and carriages are available for most series.

Linear axes with motor: www.igus.com/drylinE-finder

Linear actuators with motor

Several drylin® drive units are compatible with the drylin® E motor kits and assemblies. As linear actuators, they can be easily and quickly configured directly to the matching igus® stepper motors, power cables and proximity switches – assembled and tested from one source.

More options:

Adjustable radial clearance

The "turn to fit" feature allows individual clearance adjustment by hand. The adjustment is done in 0.01-mm increments and cannot be triggered unintentionally during the operation (SLW series 10-20).

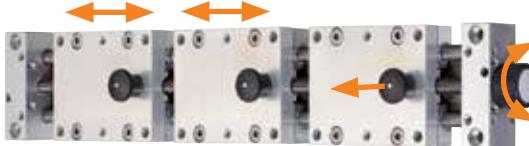

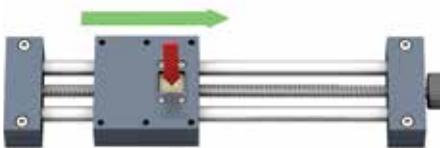

For SLW and SAW linear modules

For SHT linear modules

Fast Forward (FF)

SHT linear modules and SHTP plastic linear modules with quick-release mechanism offer a combination of accurate positioning and fast manual adjustment.

drylin® SLW "Stop and Go"

This additional function for linear carriages enables the use of an unlimited number of carriages on one guide – controlled by only one lead screw. The connection to the lead screw is engaged or released via the button.

XY-tables

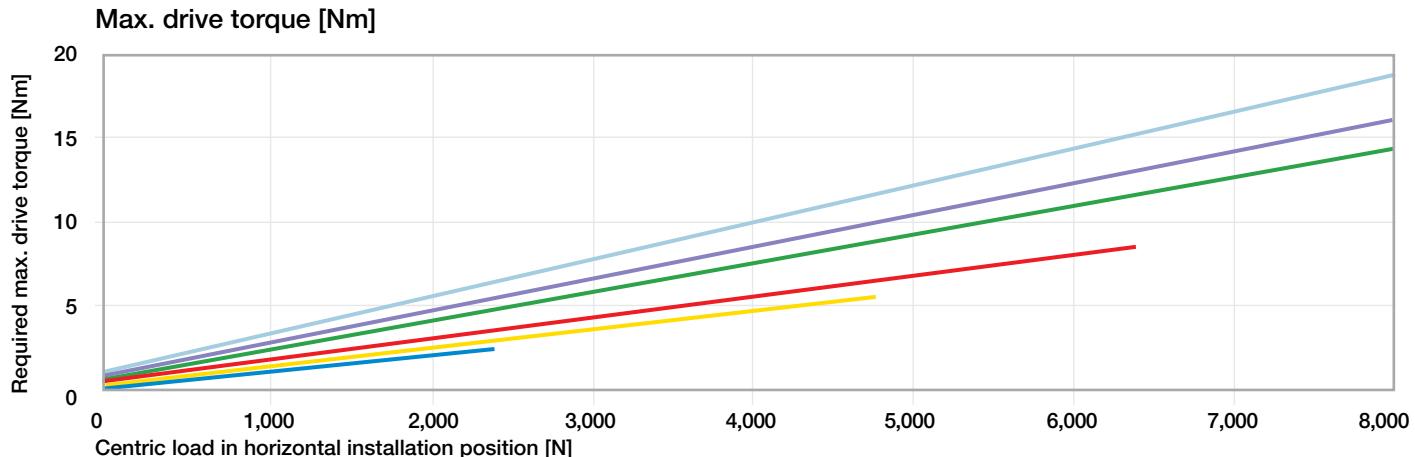

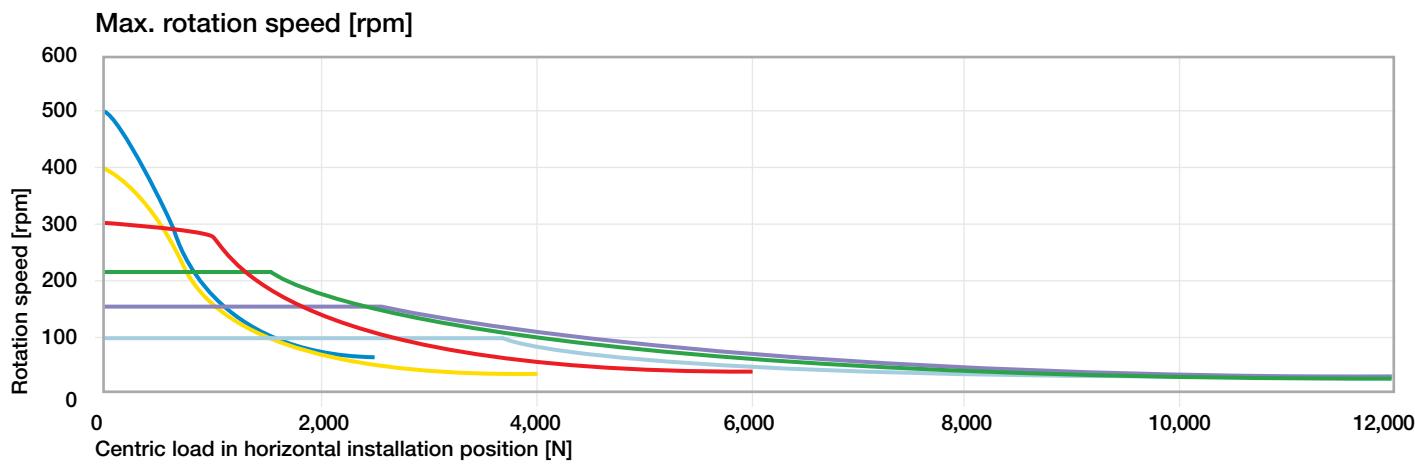

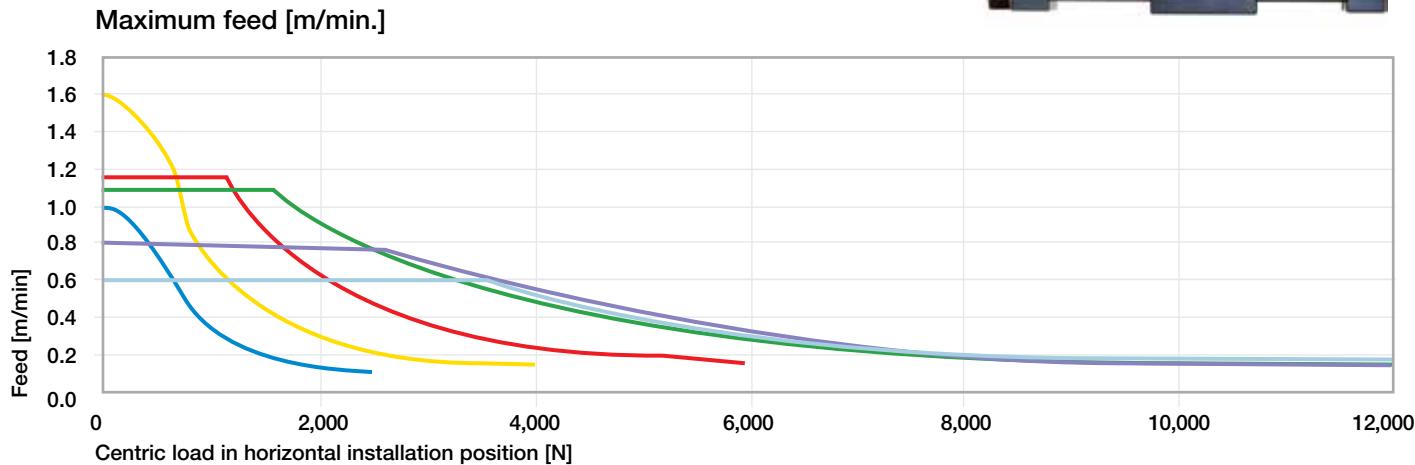

The SHT and SLW linear modules can also be configured as XY-tables. XY adjustments can therefore be given with a single unit.

drylin® drive & actuator technology | Design & calculation

drylin® linear modules have been developed for position settings of all types. The linear setting is achieved by means of trapezoidal lead screws that can be operated manually or by motor. The maximum linear continuous speed is 1.6m/min depending on thread pitch and load. The suitability of the lead screw linear units for an application can be checked using the graphs below.

HORIZONTAL

Complete drive technology configurable with or without motor

After you have selected your application parameters, the product finder shows an overview of the linear systems and the motors that are suitable. The product finder calculates the individual price of the linear axis as well as the utilization rate of the motors and the service life in strokes. With just a few clicks, you can put together a complete linear axis incl. motor, connection cables and built-on parts.

Configurable with
motor as a ready-to-install linear drive

Self-lubricating linear actuators – drylin® SHT

The drylin® SHT linear actuators are self-lubricating, while offering high precision and robust components. The units can be customized with various shaft and lead screw materials, carriage lengths and additional options. The SHT series is suitable for manual and motorized operation and is ready to connect to drylin® E motor kits and accessories.

- All bearing positions are completely self-lubricating
- Easily customized stroke lengths
- High temperature version available
- SHT linear actuators can be configured as a multi-carriage system or with right/left opposite drive

Typical application areas

- Format adjustment
- Actuators
- Sensor adjustment
- Marking and engraving technology
- Laboratory equipment

Available in 3-8 days

drylin® SHT | linear actuators | Product overview

100% self-lubricating and maintenance-free

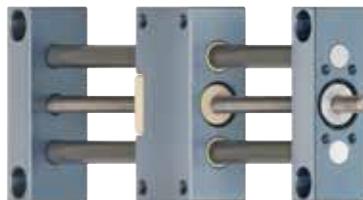

SHT linear actuator – standard

- Durable design
 - Three different sizes
 - Various materials for shaft and lead screw
 - Maintenance-free and optionally corrosion-resistant
- [Page 1568](#)

SHT-PL linear actuator, preload

- Preloaded trapezoidal lead screw nuts, preload force: 50N
 - Manually and continuously adjustable radial clearance
 - Lightweight due to aluminum and plastic
- [Page 1569](#)

SHTC linear actuator – compact carriage

- Design flexibility due to short carriages
 - Ideal for 2 carriages
 - 5 sizes from Ø 12 up to 50mm
- [Page 1570](#)

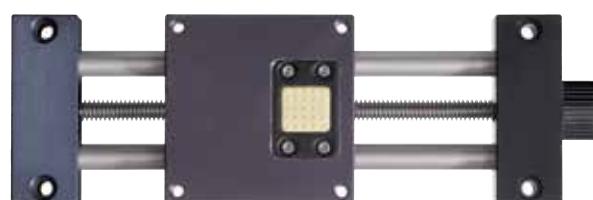

SHTS linear actuator – high helix thread

- With high helix lead screw
 - High-speed solution for fast positioning
 - Up to 100mm travel/rotation
- [Page 1571](#)

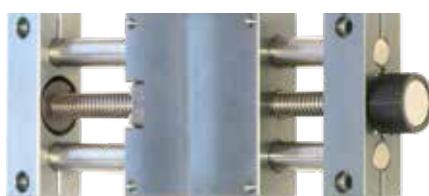

SHT-BB linear actuator – for motorized applications

- Higher rotation speed and higher precision
 - Belt drive permits radial loads
 - Constant drive torque
 - Less axial clearance
- [Page 1572](#)

SHT-FF linear actuator – "Fast-Forward"

- With quick-release mechanism
 - Precise and fast positioning
 - Self-locking lead screw and nut
 - Only recommended for horizontal applications
- [Page 1576](#)

SHT linear actuator made from stainless steel

- All components (shaft end supports, carriages, shafts, lead screws) made of corrosion-resistant stainless steel
 - Select bearings from three different iglide® materials
- [Page 1574](#)

XY-tables

- XY-tables standard and preload
- [Page 1578](#)

drylin® SHT | linear actuators | Product range

Standard

- Durable design
- Various materials for shaft and lead screw
- Maintenance-free and optionally corrosion-resistant
- TR10x2, TR18x4, TR24x5

Notes

A large, empty grid area for notes, resembling graph paper. It consists of a grid of thin, light gray lines on a white background, providing a surface for writing or drawing.

drylin® general drive technology – SLW linear actuators

Self-lubricating linear actuators based on
drylin® W guides

Drive: Trapezoidal or high helix lead screw

Torsion-resistant double shaft systems

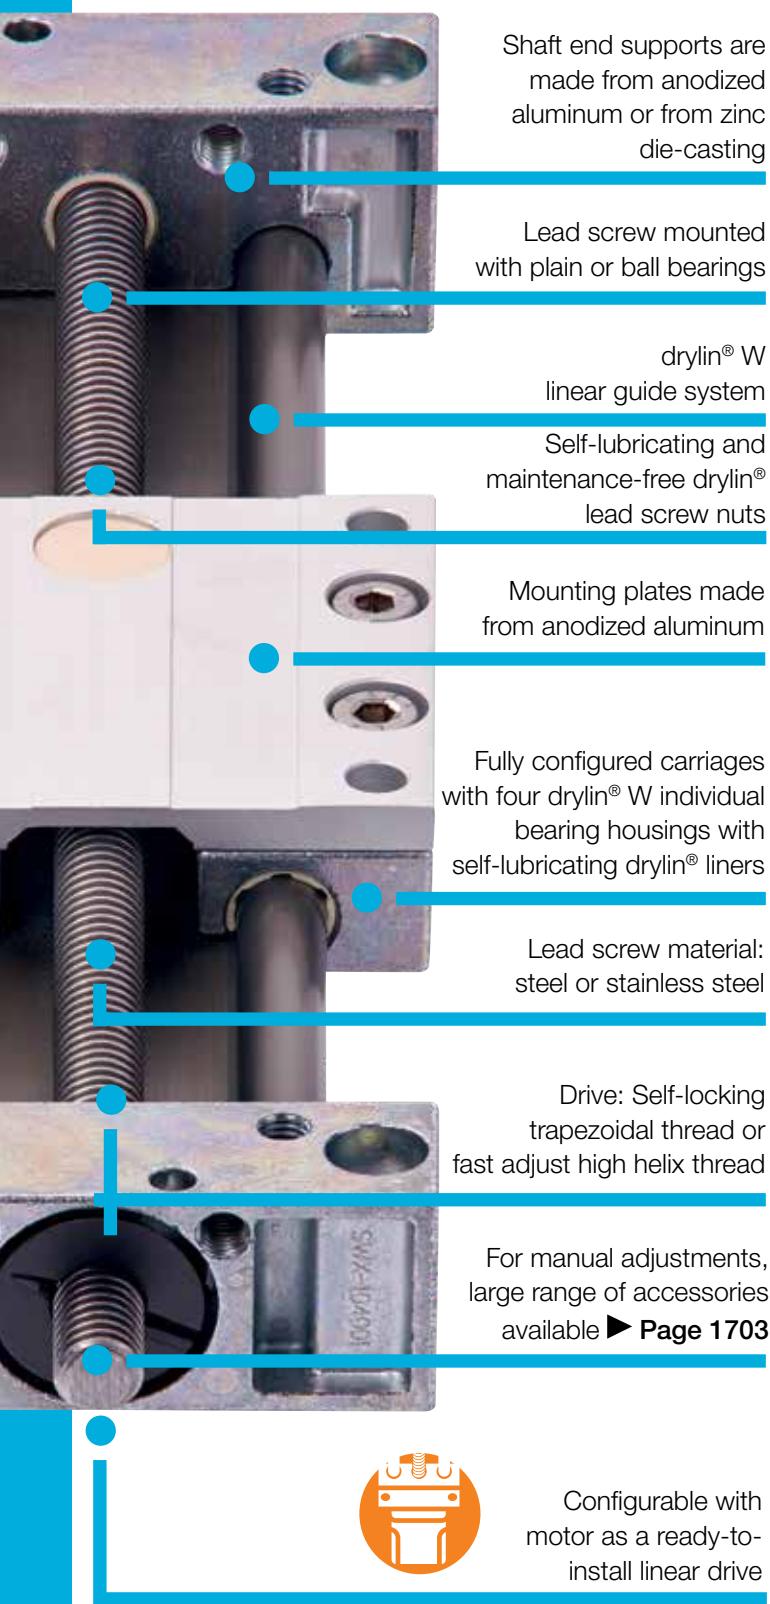

Multiple carriage and rail options

Suitable for manual and motor-operated
adjustments

drylin® SLW | linear actuators | Advantages

Modular design

Self-lubricating linear actuators – drylin® SLW

Torsion-resistant aluminum double shaft rails with many carriage versions characterize the drylin® W product range, and form a well rounded modular kit for the drylin® SLW linear actuators. The actuators are low profile, as well as robust. The drylin® SLW linear actuators are ideal for manual adjustments, but can also be fitted with a motor to make an electrical linear actuator.

- Variable carriage widths and lengths
- Flat drylin® guide rails or high profile
- Corrosion-resistant option made of stainless steel available

Typical application areas

- Format and lane adjustments
- Packaging technology
- Height adjustments
- 3D printers
- Camera adjustment

Available in 3-8 days

Detailed information about delivery time online.

Price breaks online

No minimum order value. No minimum order quantity.

Carriage lengths: 60-250mm

Carriage widths: 54-195mm

Stroke lengths: up to 1,250mm

Flat and torsion-resistant

SLW linear actuator – compact

- High torsional stability, fully supported
- Cost-effective
- Shaft end supports made from zinc, anodized aluminum or plastic (depending on installation size)

► Page 1584

SLWE-PL linear actuator, preload

- Self-lubricating and precise
- Preloaded trapezoidal lead screw nut (preload force: 50N)
- Manually adjustable radial clearance, reduction of the axial clearance

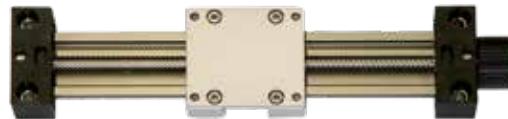

► Page 1586

SLWE-BB linear actuator, ball bearing

- Efficient and dynamic
- Quiet, reduced clearance
- Up to 1,500rpm (depending on length and load)

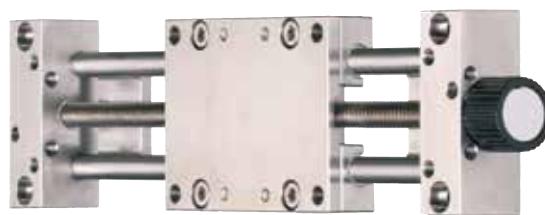

► Page 1588

SLWS linear actuator with high helix thread

- Fast positioning
- High-helix lead screw drives
- Up to 100mm stroke per rotation

► Page 1590

SLW-ES linear actuator – stainless steel version

- With corrosion-resistant steel components
- Choice of bearing material: iglide® J (standard), iglide® A180 (FDA-compliant), iglide® X
High temperature up to 302°F (+150 °C)
- For environments involving contact with water and chemicals

► Page 1594

Linear actuator special designs

- SLW with protect mechanism for applications with high levels of dirt
- High flexibility through SLWT with double lead screw
- XY-table solutions

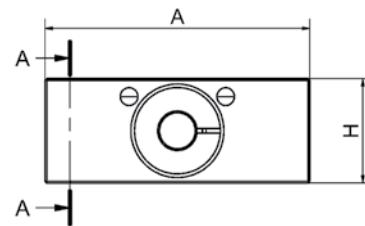

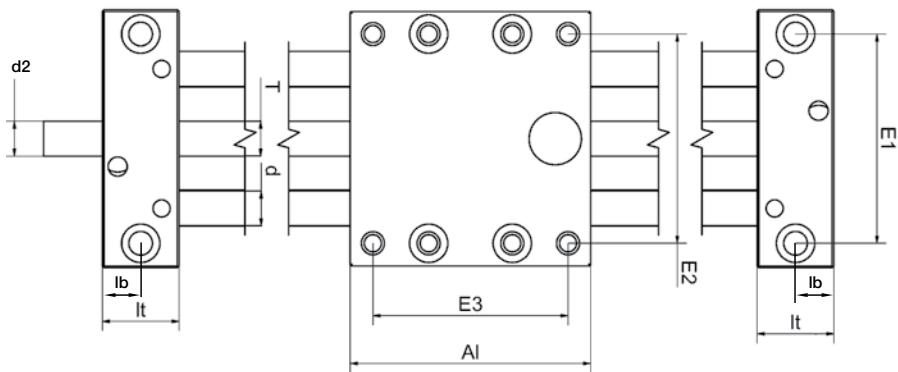

► Page 1596

drylin® SLW | linear actuators | Product range

Compact

- Flat and compact
- High torsional stability
- Fully supported
- drylin® W guide rails, hard-anodized aluminum
- Available accessories ► Page 1703
- Lead screw nuts are available separately ► Page 1510
- Available with motor

Notes

A large rectangular area filled with a uniform grid of thin, light gray lines, creating a pattern similar to graph paper. This grid covers most of the page, providing a blank space for writing notes.

drylin® general drive technology – SAW linear actuators

Self-lubricating linear actuators based on
drylin® W guides

Drive: Trapezoidal or high helix lead screw

Durable design

Ready-to-install stepper or DC motors

Ball bearing

drylin® SAW | linear actuators | Advantages

Compact high design

Shaft end supports made from black anodized aluminum

Lead screw drive with ball bearing as standard

Extremely torsion-resistant drylin® W high profile rail made from hard-anodized aluminum

Self-lubricating and maintenance-free drylin® lead screw nuts

The carriages consist of four drylin® W individual bearing housings equipped with self-lubricating drylin® liners

Mounting plates made from anodized aluminum, available in different lengths

Adapter plates for linear robot solutions available

Lead screw material: steel/stainless steel/aluminum

Drive: self-locking trapezoidal thread or fast adjust high helix thread

Configurable with motor as a ready-to-install linear drive

Self-lubricating linear actuators – drylin® SAW

The drylin® W high profile provides the torsion-resistant base for the linear axes of the SAW series. Thanks to the ball bearing supported lead screw and high profile design, the SAW linear actuators are perfectly suitable for the direct connection to stepper or DC motors. Slots in profile sections enable initiators to be freely positioned and, at the same time, enable set-up as a multi-axis linear robot by means of suitable adapter plates.

- Optimized unit for motor connection
- drylin® W high profile with variable mounting options using clamping elements or slot nuts
- For manual or electrical adjustments
- Ideal for single and/or multi-axial constructions

Typical application areas

- Positioning functions
- 3D scanner
- Format adjustments
- Linear robot structures
- Height adjustments

⁹²⁾ Lead screw end unmachined

Linear actuator with motor

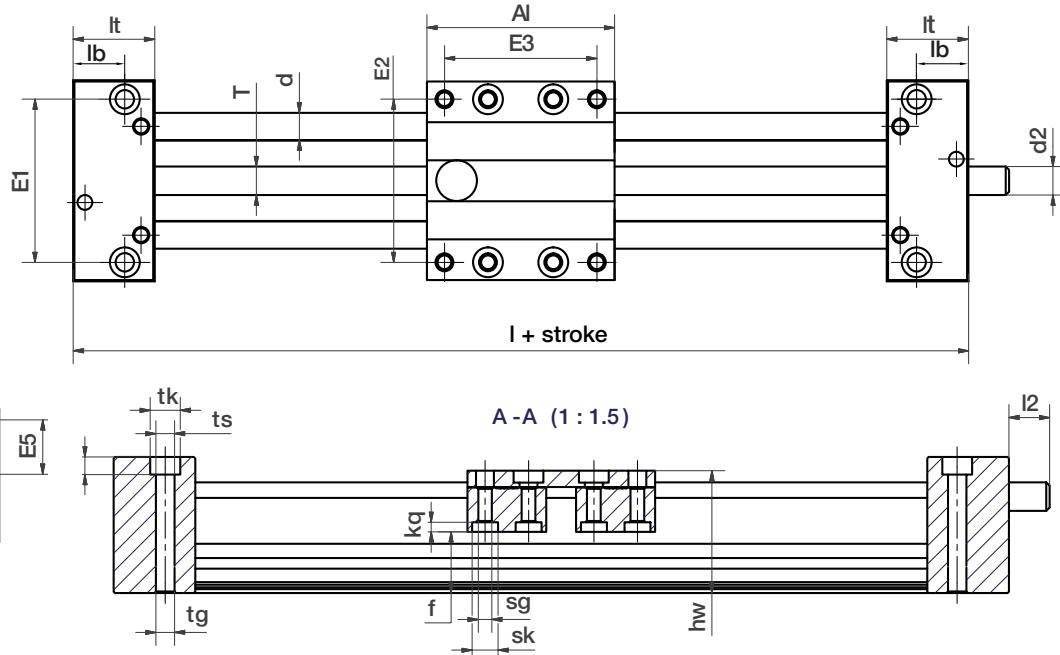

igus® delivers ready-to-install, preconfigured linear actuators (drive: lead screw or toothed belt) from stock within 24 hours. You simply choose between 3 sizes, 3 stroke lengths and 3 stepper motors ... and the system is delivered in 24 hours after you place your order.

- drylin® linear actuators with motor
- Available from stock
- Ready-to-install and pre-assembled
- NEMA stepper motors with stranded wires
- Basis drylin® ZLW and SAW linear axes
- Available accessories ► **Page 1703**

Further information about the motors ► Page 1720

drylin® general drive technology – SET linear actuators

Self-lubricating single-tube adjustment

Drive: lead screw drive

Simple design

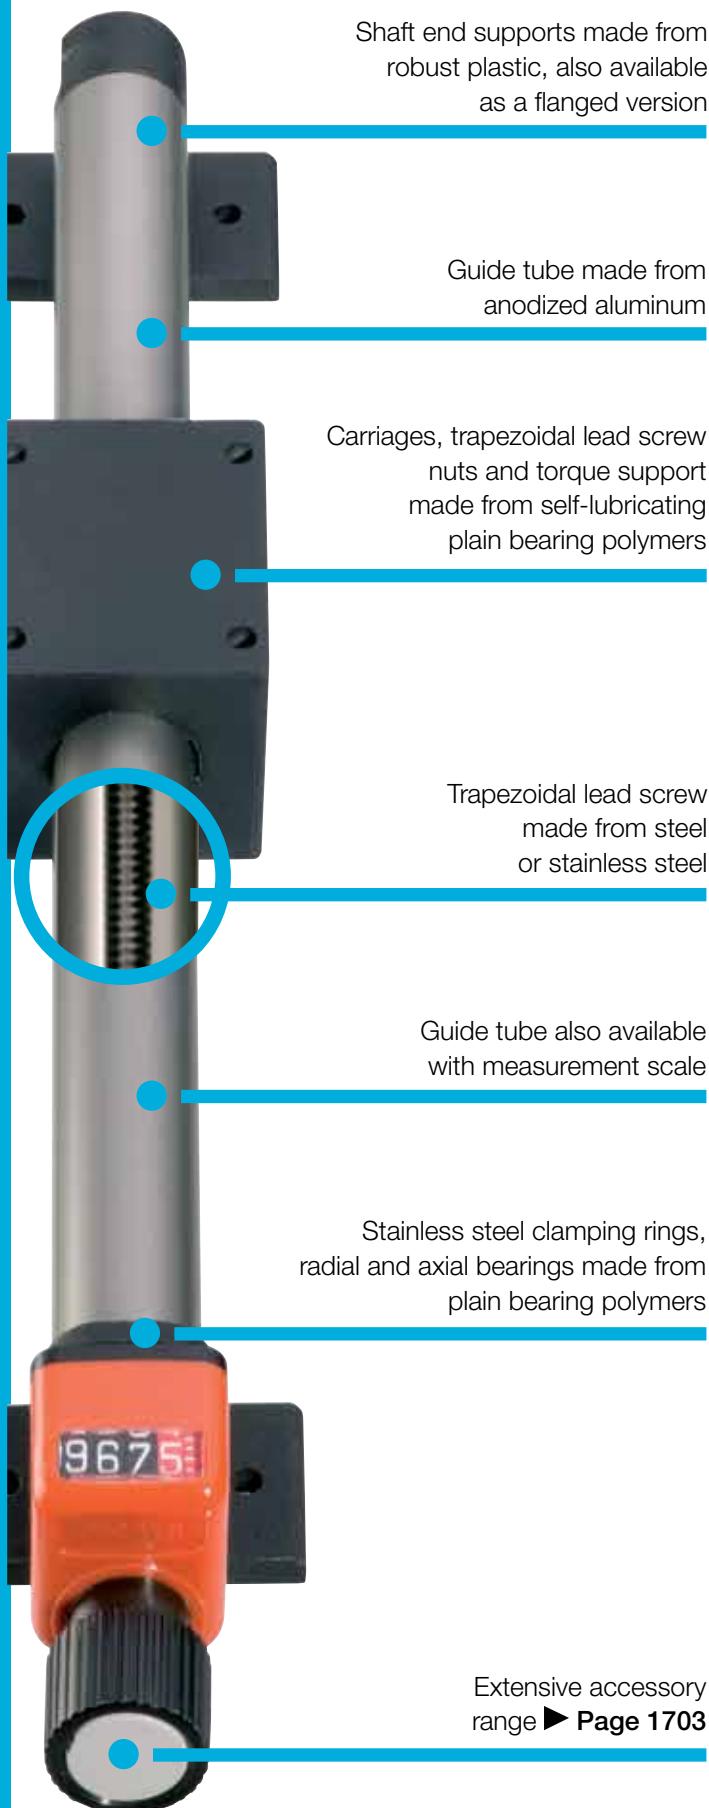

Lightweight

Temperature resistance up to +122°F (+50°C)

drylin® SET | easytube | Advantages

Single-tube adjustment

Self-lubricating "easytube"

The SET... for easy adjustments benefits by a simple and effective design. The outer anodized aluminum tube guides the carriage/s and at the same time protects the trapezoidal lead screw and lead screw nut from external influences. Carriage, torque support and trapezoidal lead screw nut are in one component and are made from a special plain bearing high-performance polymer.

- Protected lead screw
- Effective design
- Available with measurement scale
- Flanged version for axial mounting in surfaces and profiles

Typical application areas

- Sensor and camera positioning
- Format adjustment

drylin® general drive technology – SLT linear actuators

Based on self-lubricating drylin® T miniature guide

Drive: Trapezoidal or high helix lead screw

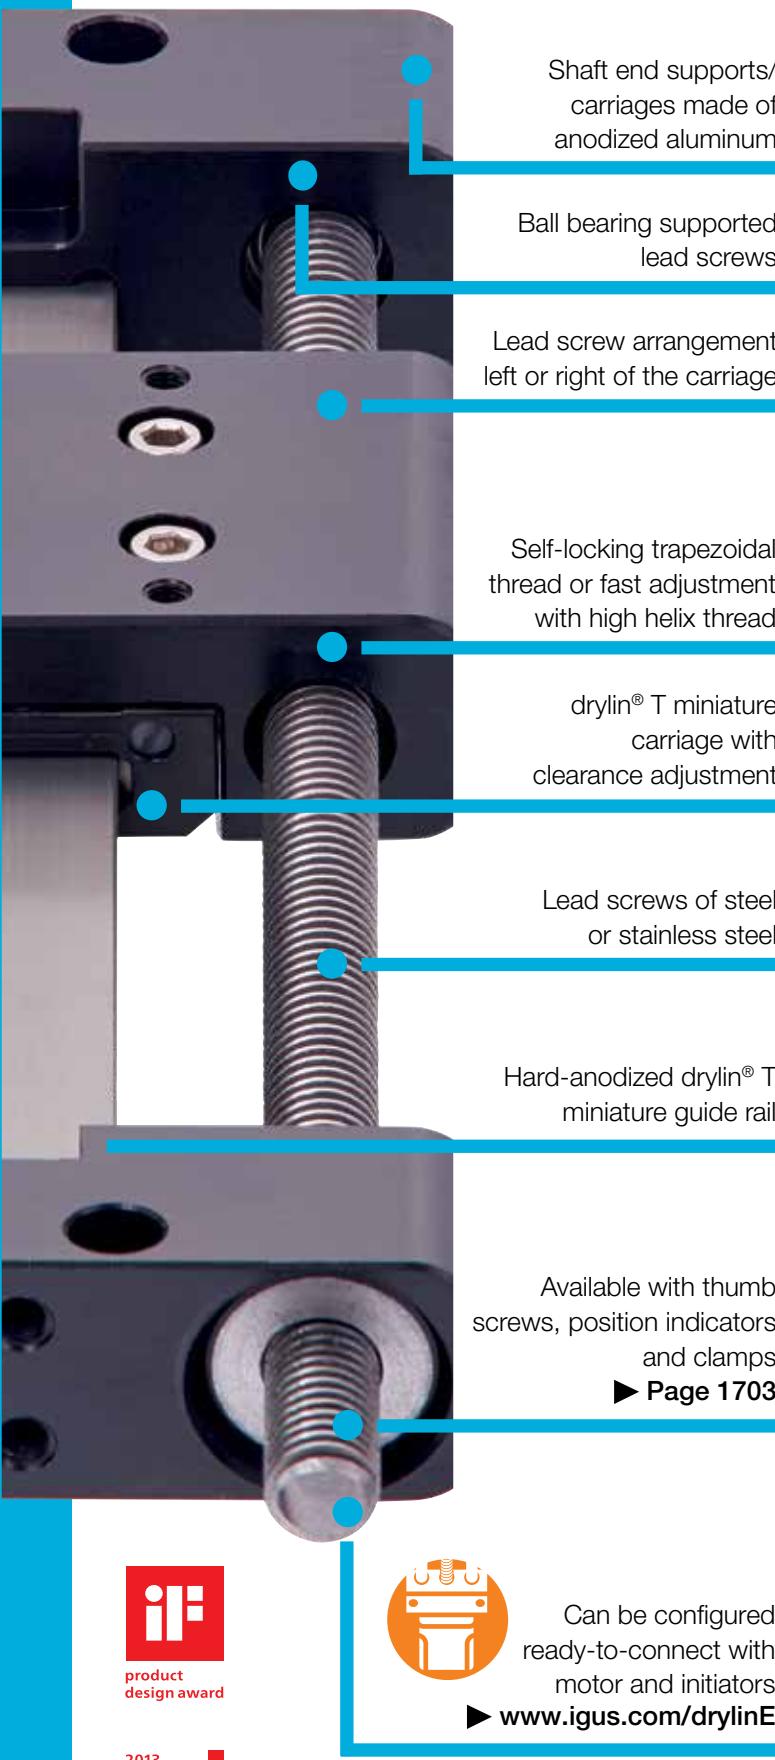

Flat and compact design

Carriages with adjustable clearance

drylin® SLT | linear actuators | Advantages

Flat, lightweight and self-lubricating

2013

Self-lubricating linear actuators – drylin® SLT

The low profile, lateral lead screw arrangement and a striking design, are just some of the reasons why the drylin® SLT linear actuator was honoured with the 2014 IF Award. Technically, the system impresses with ball bearing mounted trapezoidal or high helix thread lead screws for motorized or manual operation. The basis of the SLT series is the drylin® T miniature guide in sizes 12 and 15.

- Low-profile
- Self-lubricating, corrosion-resistant, lightweight
- Adjustable drylin® T miniature carriage
- Lead screw arrangement can be selected either left or right

Typical application areas

- Format adjustments
- Laboratory and medical technology
- Optical equipment

drylin® general drive technology – SLN/SLNV miniature linear actuators

Based on self-lubricating drylin® N low-profile linear guide

Drive: Trapezoidal or high helix lead screw

Compact design

Clearance adjustment on carriage

Precise with preload

drylin® SLN | miniature linear actuators | Advantages

Compact, precise and self-lubricating

Shaft end supports made from corrosion-resistant, robust plastic

Lead screw mounted with plain or ball bearings

Many carriage options

Threaded metal inserts for secure fastening

Minimal backlash with pre-load (preload series 05)

Rail made from anodized aluminum

stainless steel lead screws

Hand wheel available

Configurable with motor as a ready-to-install linear drive

Self-lubricating miniature linear actuators – drylin® SLN

drylin® SLN linear actuator is designed for small spaces with stroke lengths up to 250mm.

Based on the low-profile drylin N linear bearing system it is quiet and very light. The drylin® SLN can be moved manually with a thumbscrew or used with the drylin® E stepper and DC motors.

- Ultra-compact
- Three carriage types
- Self-lubricating

Typical application areas

- Sensors
- Inspection technology
- Laboratory technology
- Medical technology

⁹⁸⁾ Thread/remaining thread visible

drylin® general drive technology – ZLW belt-driven actuators

Self-lubricating linear actuators based on
drylin® W guides

Drive: Timing belt

For fast positioning

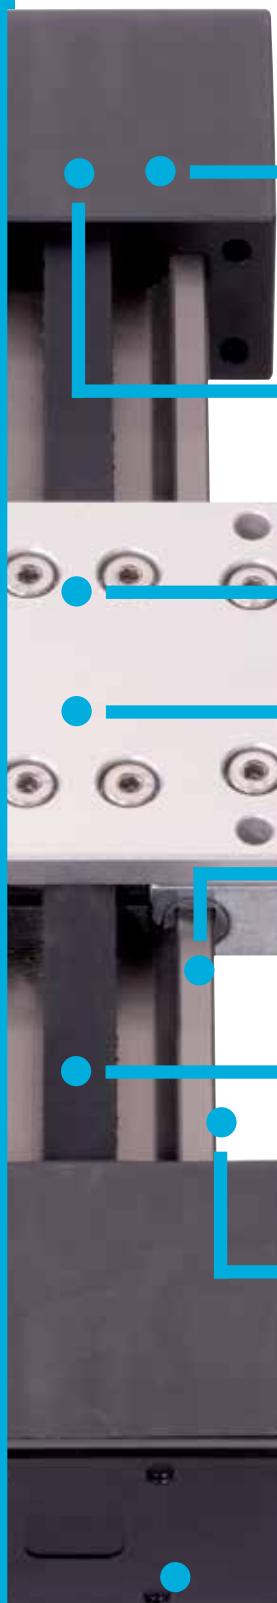

End supports with deep groove ball bearings

As single-axis or for multi-axis linear robots

drylin® ZLW | toothed belt axes | Advantages

Fast and powerful

Shaft end supports made from robust plastic with integrated deep groove ball bearing, aluminum is also available

Pulley systems run on sealed bearings for high RPM's

Multiple drylin® W carriage options including quick-change liners and various material options

Carriages available in 3 different lengths

High-profile, torsion-resistant drylin® W double shaft profile, made from hard-anodized aluminum

Abrasion-resistant PU toothed belts with steel reinforcement or Neoprene with fiberglass

Profile grooves for mounting with slot nuts or mounting clamps the slot nuts or the clamping elements

Drive shaft can be either on the left or right side, or both side

Configurable with motor as a ready-to-install linear drive

Self-lubricating belt-driven actuators – drylin® ZLW

The drylin® belt-driven actuators in the ZLW series are suitable for many different positioning and adjustment tasks. The self-lubricating drylin® W profile guide acts as a linear guide and a toothed belt acts as a drive. Thanks to the lightweight design using plastic and aluminum, drylin® ZLW belt-driven actuators have a low mass inertia, making them highly efficient. Whether as an individual system or a linear robot structure, the ZLW series offers the ideal solution in both confined spaces and applications that require a high level of support. All drylin® ZLW belt-driven actuators can be ordered ready for connection and configured with drylin® E stepper and DC motors. It is also possible to integrate other motor components.

- Completely self-lubricating operation
- 3 types: econ/basic/standard
- Variable carriage lengths
- Many motor kits available

Typical application areas

- Medical and laboratory technology
- Handling
- Positioning tasks (pick & place)
- Camera/sensor adjustment
- Machine construction

Available in 3-8 days

drylin® ZLW | toothed belt axes | Product overview

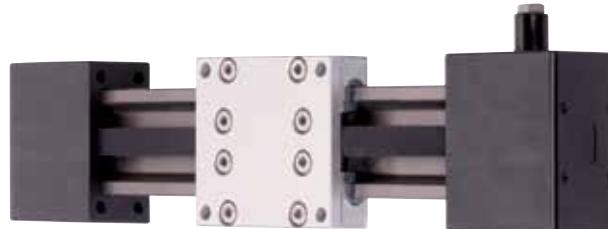

Positioning with self-lubricating toothed belt drive

ZLW econ series

- Ultra low cost
- Lightweight
- Carriage and deflection housing made of plastic
- Anodized drylin® W aluminum profile section

► Page 1634

ZLW basic series

- Cost-effective deflection axis consisting of stainless-steel square section and high-performance polymer
- Neoprene toothed belts with fiberglass reinforcement
- Hard-anodized drylin® W aluminum profile
- For installation sizes 0630 and 1040

► Page 1634

ZLW standard series

- Effective PU toothed belt with steel belting
- Single-section deflection axis made of stainless steel (shaft and tooth rim)
- Hard-anodized drylin® W aluminum profile
- For installation sizes 0630/1040/1080/1660

► Page 1634

ZLW specialists

- Deep-freeze LT version for applications down to -22°F
- UW version for underwater use
- SW version for splash water applications
- For installation size 1040

► Page 1634

ZLW - open design in installation size 20

- Variable shaft width of 120/160/200mm
- Open design
- Lightweight aluminum version available
- Corrosion-resistant stainless steel version

► Page 1636

ZLW-OD reverse

- For quick reverse positioning
- Fast right/left adjustment
- Compact due to flat drylin® W double rails
- With angle flange

► Page 1638

ZAW - for z-axis applications

- Ideal for vertical z-axis applications
- Motor and carriage stationary
- End blocks machined for customer
- Tooling attachment

► Page 1647

Motors and mounting accessories

¹²⁰⁾ When configuring your linear actuator, we ask that you note the igus® specifications for maximum stroke lengths. The performance and load specifications shown above for all drive units are based exclusively on stroke lengths within the recommended values. Exceeding these can result in undesirable effects to the function such as increased wear and noise. Belt or lead screw contact cannot be excluded, and the rated performance and load specifications may not be attainable.

Tightening torque for drylin® connections between metal parts

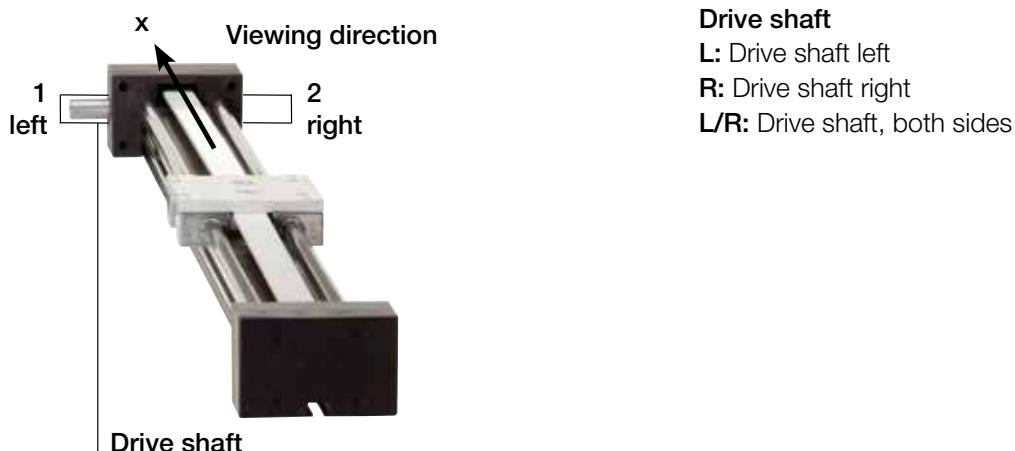

| Metric thread (Da) | Tightening torque [Nm] | Recommended tightening torque [Nm] | |
|--------------------|---------------------------|---------------------------------------|----|
| | | M3 | M4 |
| M3 | 0.5–1.1 | 0.7 | |
| M4 | 1.0–2.8 | 1.5 | |
| M5 | 2.0–5.5 | 3.0 | |
| M6 | 4.0–10.0 | 6.0 | |
| M8 | 8.0–23.0 | 15.0 | |
| M10 | 22.0–46.0 | 30.0 | |

Please be aware of the minimal screw-in depth for aluminum and zinc die-casting parts: 1.5 x Da

drylin® ZLW | toothed belt axes | Product overview

econ series

Many movements require cost-effective linear axes that focus on pure adjustment tasks. This econ series with toothed belt was developed for the fast positioning of light loads. By the compact design and low weight due to aluminum and plastic, the ZLW econ is the perfect alternative.

Basic series

Lubrication-free linear guide also driven by a toothed belt made from fiberglass reinforced neoprene (black). The drive shaft, consisting of a square stainless steel and toothed pulley made of high-performance polymer, rests on 2 deep groove ball bearings. The drive pin is 6x6mm square and made of stainless steel. The scope of supply includes a plastic adapter for a pin diameter of 10mm.

Standard series

The lubrication-free linear guide is also driven by a toothed belt made from steel reinforced polyurethane (white). Deflection shaft and drive pulley (single-piece) are made from plated steel or stainless steel. The pulley shafts are mounted in two deep groove ball bearings.

Modular kit series

A high degree of flexibility characterizes the ZLW modular system series. A modular construction system based on individual rails from the drylin® W linear system. 3 widths up to 200mm, 8M PU with stainless steel reinforcement for smooth running, either in aluminum or stainless steel.

The ZLW specialists

LT

For use at temperatures down to -30°C , the drive and deflection shaft end supports are fitted with ball bearings. Drive is a toothed belt suitable for low temperatures.

UW

Maximum protection against corrosion is provided by the UW toothed belt axis; for underwater applications. Linear carriages, drive and deflection shaft end supports made of anodized aluminum, incl. lubrication-free xiros® ball bearings. A flexible toothed belt with aramid reinforcing serves as the belt.

SW

The SW ZLW version is suitable for applications where there is contact with spray water. Corrosion-resistant due to PU toothed belt with stainless steel tie beams and stainless steel ball bearings, as well as shaft end support housing made of anodized aluminum.

Stainless steel

The ZLW modular axis made of stainless steel offers maximum corrosion protection. All components are manufactured in stainless steel, driven by 8M PU toothed belt with stainless steel reinforcing.

drylin® ZLW | belt-driven actuators | Product range

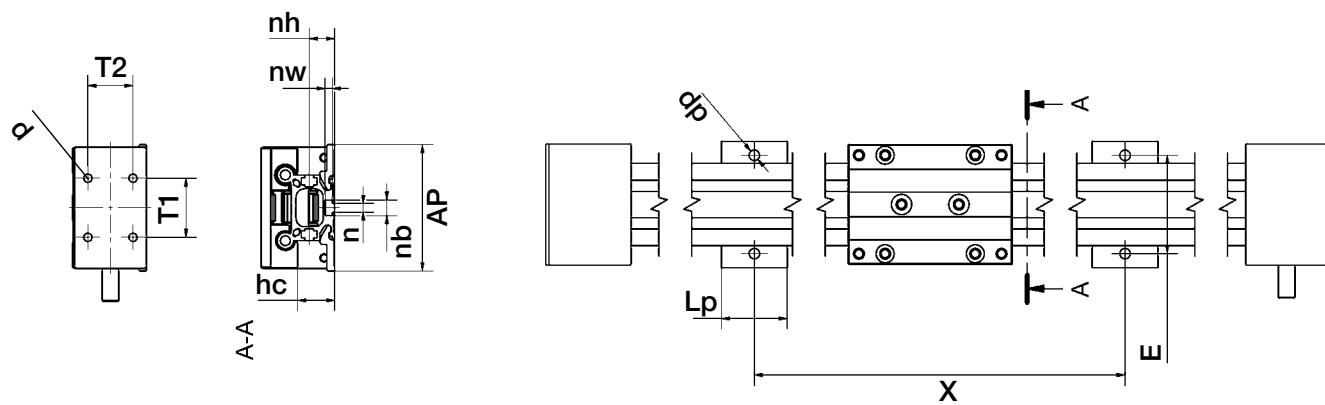

Toothed belt axis in econ, basic and standard version

- Fast positioning of small loads
- Quiet operation and flat design
- Drive shaft on one or both sides
- Linear carriages available in different lengths (except for econ version)
- Configurable with motor as a ready-to-install linear drive
- Specialist in deep-freeze, underwater and spray-water areas ► **Page 1633**

¹⁶⁶⁾ Option for WJ200UMA pillow blocks with exchangeable liners, ZLWA-□

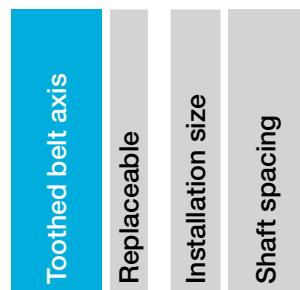

Order key

Order example

ZLW A - 20 120

Options:

Shaft spacing

120 = 120mm

160 = 160mm

200 = 200mm

Design

AL = Aluminum

ES = Stainless steel

Drive pin

Hollow shaft

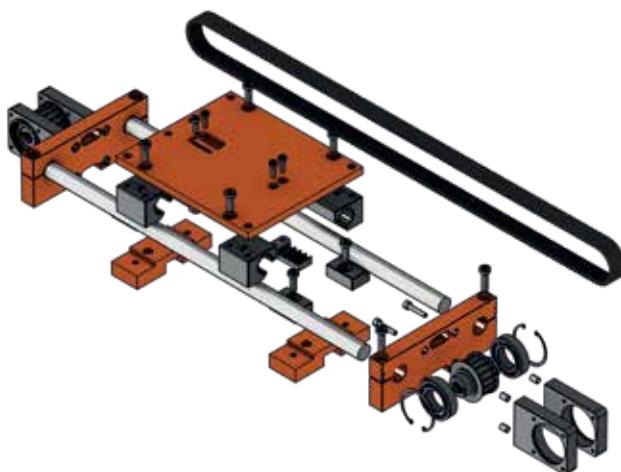

Stroke length

max. 3,000mm (AL)

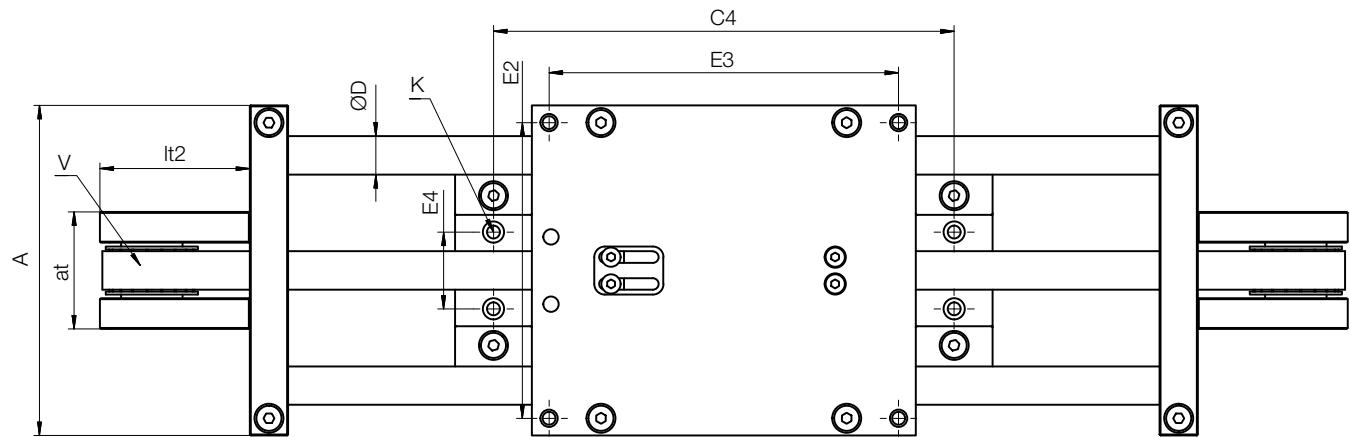

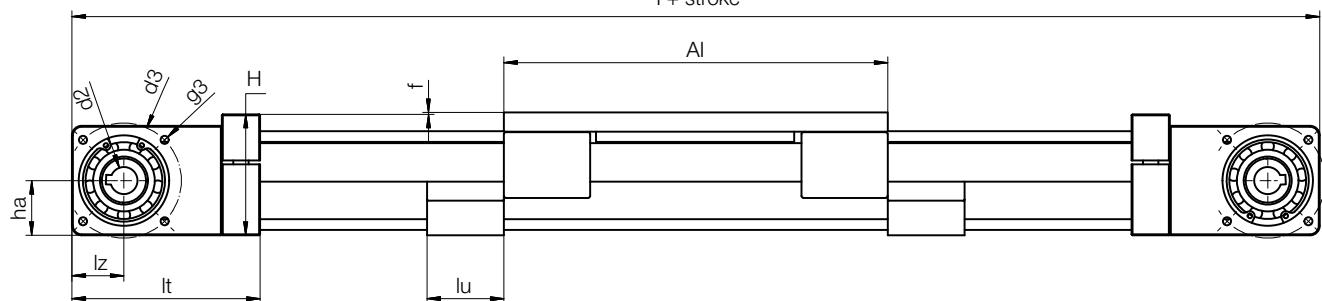

max. 2,500mm (SS)

Carriage length

200 = 200mm

I + stroke

drylin® ZLW | belt-driven actuators | Product range

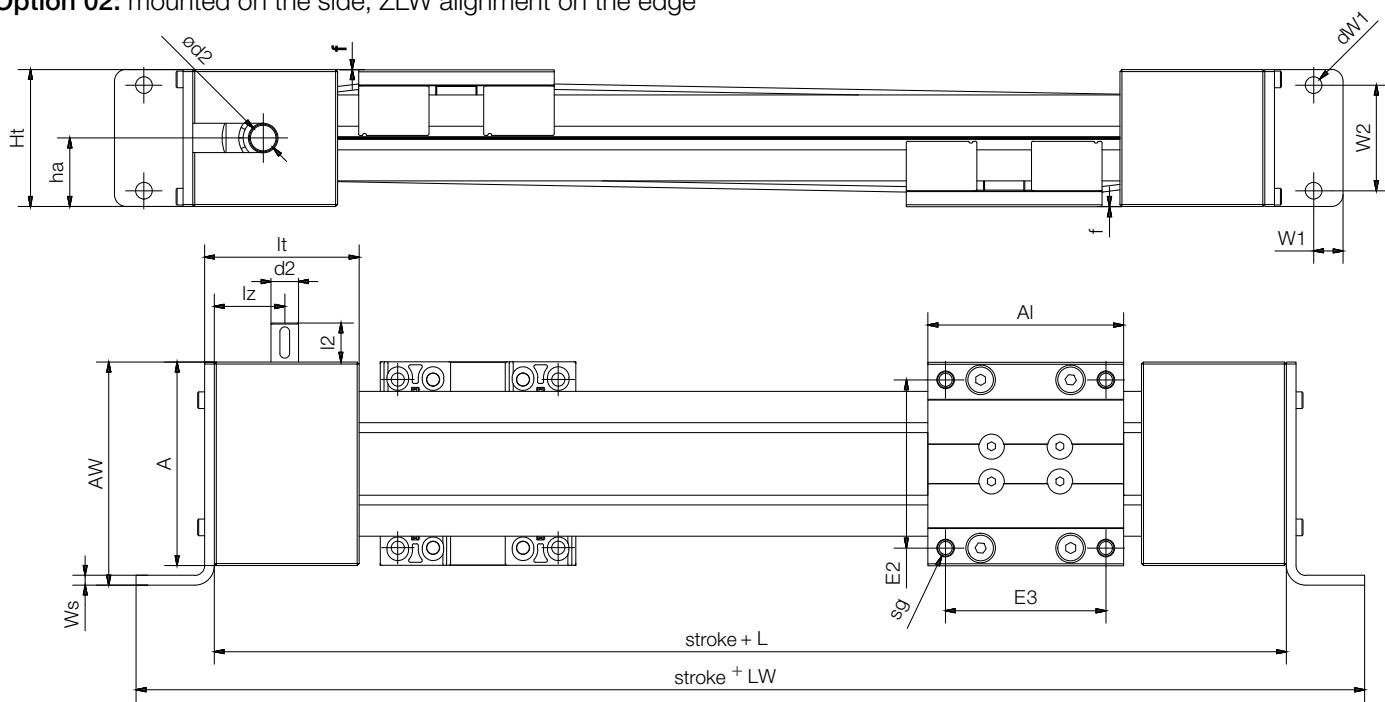

Opposite drive toothed belt with angle flange

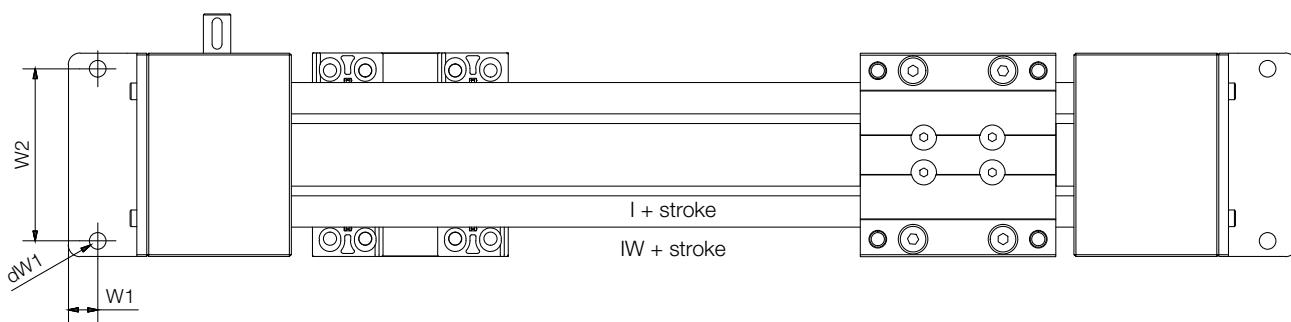

- Quick reverse positioning
- Fast right/left adjustment
- Available as standard and basic version
- Incl. angle flange for mounting
- Individual stroke lengths up to max. 3,000mm
- Radial loads up to 200N

Angle flange alignment:

Option 02: mounted on the side, ZLW alignment on the edge

Option 04: mounted horizontally, ZLW alignment horizontal

ZLWT - 10160

Belt-driven
actuator

Installation size

- Addition to the tandem toothed belt axis installation size 10/20
- Compact tandem toothed belt axis with two drive belts in one unit
- Two carriages can be controlled synchronously or independently
- With drylin® W exchange bearings for fast bearing exchange on the rail
- Can be supplied ready-to-connect with igus® motors and drylin® D1 dryve motor control system

Linear axes with motor from stock - available in 24 hours

drylin® ZLW
toothed
belt axis

DLE-SA-0001

DLE-SA-0002

DLE-SA-0003

Available in 24 hours:

drylin® linear axes with motor

igus® delivers ready-to-install, preconfigured linear actuators (drive: lead screw or toothed belt) from stock within 24 hours. You simply choose between 3 sizes, 3 stroke lengths and 3 stepper motors ... and the system is delivered in 24 hours after you place your order.

- Drive: Lead screw or toothed belt
- Completely lubrication-free
- Stepper motors with stranded wires
- Pre-assembled and tested
- Basis drylin® ZLW and SAW linear axes

L/R = Drive shaft on both sides

Notes

A large, empty grid area for notes, resembling graph paper. It consists of a grid of thin, light gray lines on a white background, providing a surface for writing or drawing.

drylin® electric drive technology – Lead screw motors

Multiple lead screw types with 0.8–50mm lead

The lead screw can be mounted front or back
without added incremental encoder

Space-saving, versatile

Motors can be used with igus® SAWC and SLN
actuators to minimize overall stage length

Available with RS422 protocol,
500 pulse, incremental encoder

NEMA stepper motors
with holding torques
from 0.1 to 2.0Nm

Direct centering
via motor/lead
screw adjustment

Lead screw can be mounted
front or back without added
incremental encoder

Durable dryspin® high helix
threads or self-locking
trapezoidal threads

Self-lubricating drylin® lead screw
nut, cylindrical form or with flange

Efficient, precise and compact – drylin® lead screw motors

drylin® with the lead screw motor range is the optimum solution for systems that need a stepper motor and integrated lead screw. The stand-alone versions have a compact design and are available with NEMA stepper motors with or without an encoder. The lead screw is centered and, in combination with igus® thermoplastic lead screw nuts and screw solutions provide long running, low wear performance.

- 3 stepper motor sizes
- Self-lubricating drylin® lead screw technology
- Available ready to connect

Typical application areas

- Medical technology
- Tool building
- Laboratory technology

Available from stock

- Stepper motors in three different sizes with stranded wire and 0.1–2Nm holding torque
- Multiple lead screw types with 0.8–50mm pitch
- Maximum precision by centering the lead screw with a motor/lead screw fit
- Matching lead screw nuts in the drylin® product range
- When using a stepper motor without an encoder the lead screw can be attached on either side
- Space-saving, versatile
- Motors can be used with igus® SAWC and SLN actuators to minimize overall stage length

XXX: Lead screw length

If desired by the factory, please order using the following assembly number:

Assembly front: MONT004F000 (flange side)

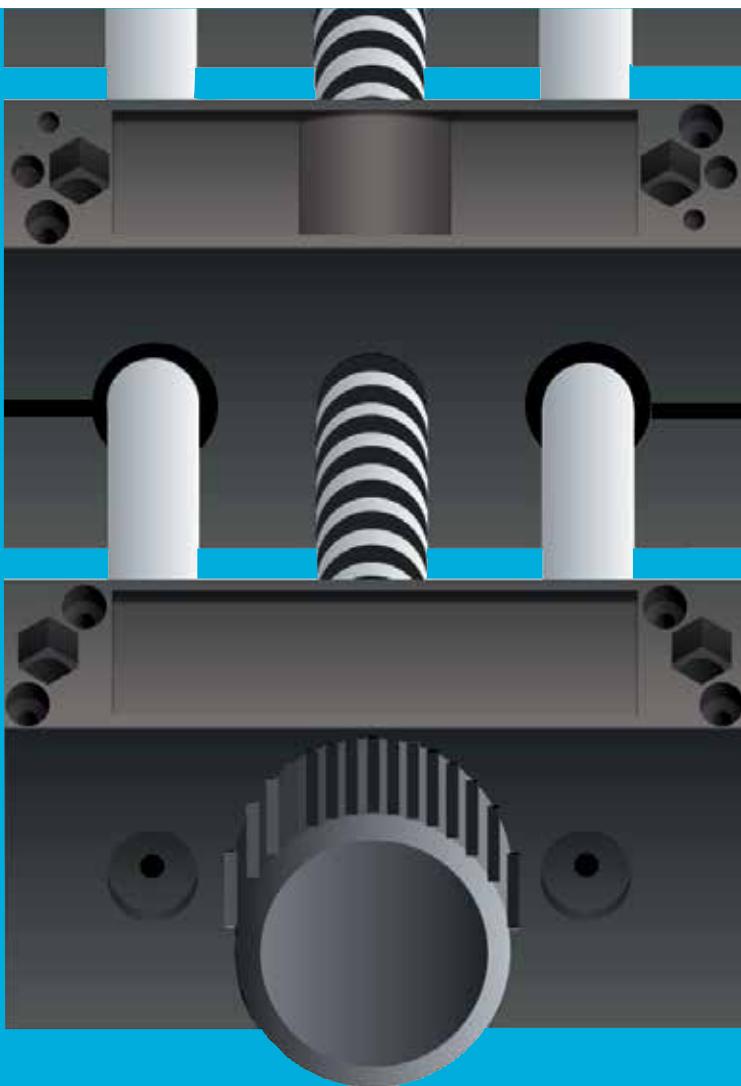

Assembly back: MONT004B000 (assembly not

possible with a motor with an encoder)

Lead screw needs to be secured with an adhesive (Loctite® 648)

Curing time: after 6 hours approximately 50% after 24 hours 100%

drylin® econ ultra low-cost series

Cost-effective linear actuators

Drive: Trapezoidal and high helix lead screw
and belt-drive systems

Lightweight construction

Corrosion-resistant

For simpler applications

Lightweight and cost-effective

Shaft end supports made from corrosion-resistant, durable plastic

Drive: Trapezoidal, dryspin[®] high helix threads, toothed belt

Guide carriage made from robust plastic

Rails and shafts made from anodized aluminum

Available as single axis or for multi-axis linear robots

Adjustment by hand or with NEMA stepper motors or DC motors

Extensive accessories available

Self-lubricating linear actuators – drylin[®] econ

econ defines the most cost-effective drylin[®] actuator series from igus[®]. drylin[®] econ models are configured and delivered so that they are ready to install and are thus the perfect alternative to complex in-house solutions for simple adjustment tasks.

- Lightweight construction due to combination of plastic and aluminum
- Ideal for high-volume applications
- Cost-effective due to injection molding and clear anodized surface

Typical application areas

- Kiosks / vending machines
- Format adjustments
- Sensor adjustments

Detailed information about delivery time online.

Price breaks online

No minimum order value. No minimum order quantity.

Carriage lengths: 26-45mm
Stroke lengths: up to 500mm

► www.igus.com/info/linear-actuators

drylin® econ SLWP linear actuator – durable in 2 sizes

- Compact and torsion-resistant due to drylin® W double shaft profiles
- Lead screw with self-locking trapezoidal or metric thread
- Fast adjustment due to dryspin® high helix thread

► [Page 1656](#)

drylin® econ SLTP linear system – low-cost through use of injection-molded parts

- Easy to assemble
- Carriage with multiple fastening options

► [Page 1657](#)

drylin® econ SHTP linear actuator

- Lead screws made from aluminum, carbon fiber, steel, stainless steel
- Carriage with integrated lead screw nuts and drylin® R liner
- With trapezoidal or high helix lead screws

► [Page 1658](#)

drylin® econ SHTP-FF linear actuator – Fast-Forward

- With quick-release mechanism
- For fast adjustment
- Self-locking
- Variable stroke lengths

► [Page 1661](#)

drylin® econ SLN miniature actuator – small and fast

- Slim, narrow design
- Multiple lead screw options
- Preloaded version available

► [Page 1662](#)

drylin® econ ZLW toothed belt axis – light and fast

- Lightweight due to use of plastic and aluminum
- Flexible mounting options
- Easily customizable stroke lengths

► [Page 1663](#)

drylin® econ DLE-FG flat linear robot – for predefined surfaces

- Linear robot based on econ belt-driven actuators
- For a workspace of 500 x 500mm
- Ready to connect with NEMA stepper motors

► [Page 1664](#)

drylin® econ | linear actuators | Product range

Low-cost SLW model

- Based on drylin® W profile guides
- Clear anodized guide rails
- Torsion-resistant double shaft systems
- Self-locking fine-pitch and high-helix lead screws available
- Available accessories ► Page 1703
